LED MENU Description

The SaltFacial® LED Phototherapy uses powerful light energy to super-charge cell turnover, helping skin to heal and be more beautiful...*naturally*. LED treatments are completely pain-free and relaxing. Depending on outcome goals, a series of 5 - 8 weekly treatments are typically required to achieve desired results.

Get beautiful skin *naturally* with The SaltFacial® and SaltFacial® LED Phototherapy. Speak with your clinician today to learn about what our LED light therapy can do for your skin!

- Decrease overall pigment and redness
- Improve skin texture, color and tone
- Gradually fade the appearance of scars and stretch marks
- Speed the healing of skin blemishes caused by acne and Rosacea
- Stimulates deep collagen renewal to strengthen and tighten skin
- Decrease post-procedure redness and swelling and shorten healing time
- Heals and prevents new acne by destroying the sub-surface bacteria which causes breakouts
- Stimulates healthy blood circulation and creates healthy new vascularity
- Reduces redness, flushing and broken capillaries
